

## **Outline**

### **Beginning:**

Overview and Project Overview - Brief description of the project and goals.

### **Middle:**

Comparing influenza deaths among age groups

Locating where vulnerable groups are most concentrated

Influenza seasonality

### **End:**

Conclusion and recommendations

Spatial view of vulnerable group deaths in the states to indicate staffing needs.

Next steps/further analysis

### **Questions to be Answered:**

What is influenza and who is at risk?

Which states have the highest concentration of influenza deaths?

When is influenza season?

Which states have the highest deaths among these vulnerable groups?

Where are additional staffing and medical assistance required?
